

THE 3RD GENERATION OF TRIPLE-R LIGHTS' ULTRA-LIGHTWEIGHT MOTORSPORT LIGHTING SOLUTIONS SEES THE RE-DESIGN AND RE-ENGINEERING OF OUR CARBON-6 LED DRIVING LIGHTS TO DELIVER MORE LIGHT, LESS WEIGHT, AND GREATER FUNCTIONALITY. AVAILABLE AS 'SPOT' OR 'WIDE' BEAM PATTERN, EACH LIGHT CAN OPERATE IN FULL BEAM MODE, OR IN A SECONDARY 'FOG' BEAM MODE. ADDITIONAL LIGHTING MODES ARE PERMISSABLE WHERE VARIABLE PWM INPUT SIGNALS AS ACHIEVABLE.

Advances in electronic design and component technologies, has allowed us to increase the light output through placing additional LEDs on the lamp's circuit board. Ultra-reflective vacuum-metallised optics harness the maximum light output for the road and track ahead. The lamp housing is constructed from high-strength and heat-resistant PC-ABS material. Thermal control of the lamp is managed through a CAE-optimised anodised aluminium element, meticulously engineered to maintain full and optimal lighting performance of the LEDs, while minimising weight. Dynamic drive modulation within the lamps, prevents damage to the electronic components in more extreme environmental and thermal conditions. The Carbon-6 lamps have been designed alongside a range of carbon-fibre rally pods, compatible across a wide range of vehicle makes and models. Pod adjustment and fine-tuning elements, alongside compatible lens cover options, ensures a superior rally lighting solution.

### **MOMENTARY SWITCH - PIN4 - FOG MODE**

- If the hold time for the switch is ≤ 750ms then the beam pattern changes from **default** mode to **fog** mode and is retained after the switch is released.
- If the hold time for the switch is ≥ 750ms then the beam pattern changes from **default** to **fog** <u>but</u>, the mode will not be retained after the switch is released and it will revert to the previous state (default).

Lamp features a built-in DT04-4P Deutsch Connector. (Gold plated solid DT contacts)

Vehicle side will require the a DT06-4S Deutsch Connector.

# 4-WAY SYSTEM

(0064-MKII/SKODA/C3)

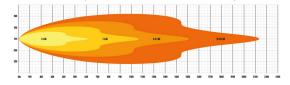

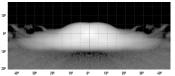

#### 4 WAY RALLY PODS (0064-MKII/SKODA/C3)

Our ultimate solution for easy adjustment on vehicle, and maximum lighting performance. Pods include fine tuning adjustment mechanism as refined and used in the World Rally Championship.

RAW LUMENS	37,440	
EFFECTIVE LUMENS	26,100	
QUICK RELEASE CAPABLE	YES	
CURRENT DRAW (AT 14.4V)	24A (E-BOOST MODE)	

#### 4-WAY RALLY POD (2x CARBON-6 SPOT & 2x CARBON-6 DRIVE) - E-BOOST MODE

# **3-LAMP SYSTEM**

(0068-B & 1117K)

#### **BOOMER SINGLE (0062-00C6)**

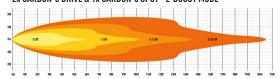

features quick release fasteners, including mounting fasteners to the bonnet. We recommend 2x DRIVE for maximum spread.

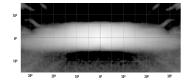

#### **ALUMINIUM SIDE BRACKETS (1117K)**

No left/right adjustment.
Should be combined with a SPOT product aimed at the centre of the horizon for maximum distance.)
NOTE: Fasteners for mounting to vehicle are not supplied with this kit.

#### 2x CARBON-6 DRIVE & 1x CARBON-6 SPOT - F-BOOST MODE

# 2-LAMP SYSTEM

(0062-00C6)

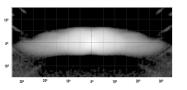

#### **BOOMER SINGLE (0062-00C6)**

features quick release fasteners, including mounting fasteners to the bonnet. We recommend 1x SPOT and 1x DRIVE for maximum distance and spread. Both lamps should be aimed dead ahead

RAW LUMENS	18,720		
EFFECTIVE LUMENS	13,050		
QUICK RELEASE CAPABLE	YES		
CURRENT DRAW (AT 14.4V)	12A (E-BOOST MODE)
