**INSTRUCTIONS**

## IMPORTANT INFORMATION

Please disconnect the vehicle battery before installing or servicing your LED light installation. If in doubt, it is recommended to use the services of a professional installer. It is recommended to use the available corresponding Triple-R wiring kit for your product. If utilizing existing (non Triple-R) wiring, make sure to use the appropriate wire gauge and fusing in line with your lights.

Please note: every Triple-R product is protected against moisture ingress. Your warranty stays in place even if the lamp connector is removed. For more details please see overleaf.

## WARRANTY INFORMATION

Your purchase of this Triple-R Lights product is an investment in a product designed and manufactured to the highest standards, but sometimes things can go wrong. You do not need to register your product with us, as we can trace the product through the unique serial number of the lamp.

In the unlikely event of having to make a claim, please retain your purchase receipt and pass it back to the retailer from where you first purchased the product, at the point of raising any issue.

We hope you enjoy your Triple-R Lights product, and wish you many years of a safer, more enjoyable night driving experience.

## ELECTRICAL INFORMATION

### WITHOUT BACKLIGHT (2-PIN) | SENTINEL 7"

### WITH BACKLIGHT (3-PIN) | SENTINEL 7" ELITE

See adjacent for additional wiring information for lamps that have integrated white and amber backlight function.

## SENTINEL BACKLIGHT FUNCTION

Some Sentinel lamps come with the option to connect a white or amber backlight. For operation of either color, connect the corresponding colored signal wire and pin, into the remaining vacant lamp connector terminal (as per illustrations below).

For contact removal instructions, visit our YouTube channel.
